

2019
Environmental Excellence
Award

Presented to
City Park Golf Course, Denver, Colorado
Architect: Todd Schoeder, ASGCA

The redesign of the historic 1913 City Park Golf Course addresses major urban flooding issues by utilizing 20 acres of the golf course for floodwater detention and water quality treatment.

Along with the integrated stormwater management system, the new golf course retains the character, charm and sporty aspects of the original Tom Bendelow design.
